

Product ProChek-II / PT-202**Product Type:** Protein Detection Test with Pre-Moisten Swabs**Reorder Number:** PT-202**Description:** The test kit for detection of protein residues on surfaces and inside hollow instruments.**Performance Characteristics:** The formation of a protein-dye complex is used to detect small protein residue by means of a color change on a swab. Swabbing is the preferred sampling technique in order to also detect Insoluble residue.**Color Change:** To Blue-Green for positive results.
Blue-Green on the swab and/or the activating agent color changes to Blue-Green, represents protein is present.**Measuring Range:** The test can detect down to 1 ug of insoluble protein by showing a Blue-Green spot.
For soluble proteins color change is immediate.
For denatured proteins color change can take up to 5 minutes.**Physical Characteristics:**

Pre-Moistened swab

Protein Detection Vial (Scope-Check) [activating agent]

Selling Unit - 1 Case includes:

15 - single use tests: each test containing 1 Pre-Moistened swab and 1 Scope-Check Vial

1 card stock vial holder (4.5" L x 3" W x 1.375" H)

1 Instructions for Use

1 Instruction Guide for Residual Soil Tests Pocket Brochure

Packaged in 1 white card stock box (9" H x 8" W x 2.5" D)

Environmental Limitations:**Storage:** 2°C - 25°C (35.6°F - 77.0°F) Keep away from light and heat and do not freeze.**Shelf Life:** The expiry date is printed on the product packaging label.**FDA 510(k) Release to Market Date:** N/A
