### Instructions for Using Product

**Description of Use(s)**

Endoscope brushes are used in association with water and other solvents to remove organic soils and other residuals from the channels and valves of flexible endoscopes.

**Preparation for Use**

**Diagrams (drawings, pictures)**

**Steps for Use of Product**

1. Select the proper diameter and length of brush for the internal surface/channel to be cleaned. [See Flexible Endoscope General Diameter Guide](#) for size and color reference.
2. Control Head Cleaning Brush:
   a. Remove the valve(s) from the control head of the endoscope.
b. Use the brush and the cleaning solution of choice to gently cleanse the valve openings.

c. Avoid twisting or torque of the brush handle. The brush handle will prevent the brush from being pushed too deeply in the valve openings.

d. Use the brush and the cleaning solution of choice to clean the control head and the control head dials.

3. Channel Cleaning Brushes:
   a. Select the size brush appropriate for the channel to be cleaned.
   b. Always brush channel while submerged in the cleaning solution.
   c. Use short strokes advancing the brush completely through the channel until it emerges from the distal end.
   d. Carefully pull the entire cleaning brush completely out of the distal end.
   e. Inspect whether there is debris on the bristles. If debris is observed, submerge the bristle end of the brush in the cleaning solution using gloved fingertips to remove the debris.
   f. Repeat steps (a) through (e) until no debris is observed on the bristles.
   g. Dispose of the brush after use.

**Interpretation of Results**

**Contraindications of Test Results**

**Documentation**

**Special Warnings and Cautions**
- Endoscope cleaning brushes are for single-use only.
- Endoscope cleaning brushes cannot be reused or reprocessed.
- Consult and follow closely the IFU from the endoscope manufacturer and the cleaning agent manufacturer.
- Select a brush based upon the diameter and length of the channel chosen. Do not force a brush into a channel to avoid possible damage to the endoscope.

**Disposal**
Treat used endoscope brushes as a biohazard and dispose of in accordance with facility policy of contaminated items.
