

Instructions for Use: Anti-Fatigue Mats

Brand Name of Product	Anti-Fatigue Mats
Generic Name of Product	Anti-Fatigue Mats
Product Code Number(s)	AFM-580
Purpose of Product	The Autoclavable Mat provides comfort in sterile environments including operating rooms, pharmacies where medicines are mixed, laboratories, radiology rooms and HazMat areas. The SBR/Nitrile compound is resilient, and totally anti-microbial. Tested to withstand extensive sterilization in an autoclave, the mat's solid, non-porous surface can also be wiped clean. The "domed" surface design provides an ideal level of comfort, while the individual size fits flat into standard autoclaves for efficient, effective cleaning.
Range of Applications for Product	For use in controlled environments.
Key specifications of product	SBR/Nitrile, with an anti-microbial additive passes ASTM G21-96 (2002) – Latex Free. Edges are safety beveled.

Instructions for Using Product

Description of Use (s)	Use in controlled environment to provide and ideal level of comfort.
Preparation for Use	
Diagrams (drawings, pictures):	
Steps for Use of Product	Lay flat on the floor in the area of use.
Interpretation of Results	
Contraindications of Test Results	
Documentation	
Special Warnings and Cautions	
Disposal	

Reprocessing Instructions

Point of use:	
Preparation for decontamination:	
Disassembly Instructions:	
Cleaning – Manual:	Use a mixture of hot water and a mild soap (like Ivory Liquid) with a pH between 4.0 and 9.0 and wipe the mat down. Another option is to use a pre-moistened wipe such as Sani-Cloth HB or SANI-CLOTH® PLUS both of which have very low levels of alcohol.
Cleaning – Automated:	Can be washed in the automatic cart washer, but temperature cannot exceed 285 degrees Fahrenheit.
Disinfection:	
Drying:	
Maintenance, inspection, and testing:	
Reassembly Instructions:	
Packaging:	
Sterilization:	Lay flat in an autoclave. Clean for 4 minutes at 270 degrees Fahrenheit.
Storage:	
Additional Information:	The anti-microbial agent used in the Autoclavable Mat is totally safe. The agents' CTFA/INCI name is Triclosan, but it's more commonly recognized by its' trade name, Oletron. This compound is totally non-toxic and is commonly used in deodorant soap bars, liquid soaps and hand washes, shower and bath products, lotions creams, hair shampoos, shaving products, toothpaste and mouth rinses. Oletron also has a wide range of industrial and institutional applications including hand and surface disinfectants. Other applications include, packaging materials, medical devices, fibers, fabrics and flooring materials.
