### Steps for Use of Product

1. **Filling out information on Transportation Identification Label (not all labels have space for information):**
   
   Upon completion of assembling your transportation cart/bin, fill out the top portion of the label.
   
   Using a marker fill out the following (if applicable):
   
   - Date (When does the procedure take place?)
   - Case/Procedure (Intended use for the contents)
   - Room/Facility (Where is the procedure taking place?)
   - Initials (Who picked/asmbed the supplies?)

2. **Removing label from the plastic backing:**
   
   Before placing the label on the transportation cart/bin, slightly bend the bottom ½” of the label on the perforation. This will assist in the removal of the label in decontamination by creating a free piece of the label to grab.

3. **Placing the label on the cart/bin:**
   
   The label should be placed in a visual place for staff to see. This is typically on the door or top of the transportation cart/bin.

4. **After the procedure:**

The staff fills out the transportation checklist on the bottom portion of the label to designate all safety checks have been complete, including staff initials and OR room/facility. This includes marking yes, no or N/A for the following:

- Linen has been removed
- All sharps have been removed
- Items are pre-cleaned
- Clean and dirty items are separated
- Initials and room #

NOTE: The staff in decontamination must be able to trace the contaminated items back to a specific location of use or patient in the unfortunate event of a bloodborne pathogen exposure.

5. **Removing the clean tab on the label:**

- Hands should be covered with a clean pair of gloves for removal of the sticker.
- Remove the “Clean” tab by pulling up where it says “Pull Here” in a right to left fashion.
- The biohazard symbol and the word “Dirty” will be revealed under the “Clean” tab once it is removed.

6. **Removing the label in decontamination:**

- Prior to removing the label, clean all the items per your facility policy and empty the transportation cart/bin.
- Remove the label by grabbing the bottom area just below the perforation. Pull in a slow motion up and away from the cart. DO NOT PULL FAST. Residue may left behind if pulled too quickly.
- Label can be discarded in the garbage.

### Interpretation of Results

| Contraindications of Test Results
| Documentation
| Special Warnings and Cautions
| Disposal

- Do not wash or sterilize with instruments.
- The Transportation Label is a one-time use label and must be discarded after each use in a facility approved waste container according to policy.
