### Instructions for Using Product

**Description of Use(s)**
Seal closed sterilization container with a tamper evident lock to insure container has not been open since sterilization.

**Preparation for Use**

**Diagrams (drawings, pictures)**

**Steps for Use of Product**
1. Pass arrow shackle through opening of item to be sealed.
2. Firmly push arrow shackle into locking device until it engages.
3. Pull on seal to insure it has been properly locked.

**Interpretation of Results**
- Steam sterilization: If purchased with optional steam indicator dot, reactive ink will turn brown/dark brown in the presence of steam sterilization (270°F +/- 5°F).

**Contraindications of Test Results**
If a seal is broken, assume sterility has been compromised and the tray must be reprocessed.

**Disposal**

| • Seal is materially compatible with steam, EO and gas-plasma/VHP sterilization  
| • If purchased with optional steam indicator dot: Class 1 chemical indicator, 270°F for up to 4 minutes.  |
| Storage |  
| • Should be stored in closed cabinets or otherwise protected from the UV-light source. The process indicator is sensitive to UV-light and may change color over time, if not stored properly.  |
