

TECHNICAL STATEMENT

Non Latex

As used in this discussion, the term latex refers to the natural rubber latex manufactured from a milky fluid that is primarily obtained from the rubber tree (*Hevea brasiliensis*). Some synthetic rubber materials may be referred to as "latex" but they do not contain the protein that produces latex allergy.

We hereby declare that we do not use latex in any form as a raw material for the production of the WIPAK® and STERIKING® product range. We do not intentionally add latex at any stage of the production of the WIPAK® and STERIKING® medical packaging films.

The raw materials used in WIPAK® and STERIKING® products have been permitted for use in the manufacturing of food or drug packages by FDA and EC.

This information is based on our current knowledge and on the information given by our raw material suppliers at the date hereof.

Wipak, Medical

The information contained herein is to our best knowledge accurate and reliable as of the date of publication. WIPAK extends no warranties and makes no representations as to the accuracy or completeness of the information contained herein, and assumes no responsibility regarding the consequences of its use or for any printing errors. Our products are intended for sale to industrial customers in their own specific use. It is the customer's responsibility to inspect and test our products in order to satisfy himself as to the suitability of the products for the customer's particular purpose and suitability to the actual circumstances the product is exposed to. The customer is also responsible for the appropriate, safe and legal use, processing and handling of our products especially when recommendations for safe use and storage are given. Nothing herein shall constitute any warranty, nor is a protection from any law or patent to be inferred.
